For maximum receiver operation

By extending the IR signal of your remote control, the infrared extender SRT IR 01¹ allows you to operate your receiver, even when it is located out of sight of the IR signal. Just place the receiver in a locked cabinet or in another hidden place and put the infrared extender on a convenient place and you will be able to operate your receiver without direct visual contact.

- For hidden placement of the receiver and maximum operation
- No additional settings are required
- Extends the range of the remote control up to 7 m
- ±180° angle
- 1.5 m cable length

Installation option:

1. The infrared extender is connected to the IR connector of the device.
2. The receiver is mounted on the wall or placed inside a cabinet.

¹ Compatible receivers at the date of production are: STRONG SRT 8501, SRT 8527, THOMSON THT701. For an updated list visit www.strong.tv.
