Product code: 21005258  
EAN code: 8024427018020

Slot CI+ on the rear panel, compatible with  
SmarCAM TELE System for tivùsat

TELE System is glad to introduce the newest digital satellite receiver Common Interface TS4502 S2CI+, able to grant the reception of all typologies of satellite channels, free and encoded, even in high Definition. Thanks to the compatibility with the High Definition transmission DVB-S2 HEVC, the user needs simply to connect the device to the HD TV, through the HDMI 1.4 digital output, to can enjoy extraordinarily clean images and sounds. The predisposition to the PVR and Timeshift functions via USB, together with the extremely competitive price are the strengths of this receiver. This device is compatible with the Tivù Sat CAM distributed from TELE System.
